BY EMAIL

4th March 2015

Dear Mr Stone,

**Upgrade Works to 136583_1095_O2 EXISTING RADIO BASE STATION MAST LAND
AT Tythe Barn Farm, Tithebarns Lane, Burnt Common, Woking, Surrey, GU23 7LE**

Vodafone Limited has entered into an agreement with Telefónica UK Limited pursuant to which the two companies plan to jointly operate and manage a single network grid across the UK. These arrangements will be overseen by Cornerstone Telecommunications Infrastructure Ltd (CTIL) which is a joint venture company owned by Telefónica UK Limited and Vodafone Limited.

This agreement allows both organisations to:

- Pool their basic network infrastructure, while running two, independent, nationwide networks
- Maximise opportunities to consolidate the number of base stations
- significantly reduce the environmental impact of network development

Vodafone has identified this site as suitable for an equipment upgrade. The purpose of this letter is to consult with you and seek your views on our proposal before proceeding with the works. We understand that you are not always able to provide site specific comments, however, Vodafone is committed to consultation with communities for mobile telecommunications proposals and as such would encourage you to respond.

As part of Vodafone's continued network improvement program, there is a specific requirement for an upgrade at this location to provide 4G coverage to the area

Mobiles can only work with a network of base stations in place where people want to use their mobile phones or other wireless devices. Without base stations, the mobile phones and other devices we rely on simply won't work.

Please find below the details of the proposed site and the Technical need:

- **136583_1095_O2 EXISTING RADIO BASE STATION MAST LAND AT Tythe Barn Farm, Tithebarns Lane, Burnt Common, Woking, Surrey, GU23 7LE**
- Installation of new telecommunications equipment in order to make improvements to the existing digital network coverage and to provide new LTE (4G) coverage to the surrounding area.
- The requirement is to replace 6 no of existing antenna with 6 no of new antenna at the current height of 25m AGL. An existing 3 no antennas will remain at this height. Furthermore 6 no of RRUs will be mounted behind the antennas on the current headframe. A 1 no 0.3m dish is to be installed at 19.60 AGL, which will run parallel to the existing 1 no 0.3m dish that is already in place. The existing 3 no antennas currently at 16.2m AGL will be removed. The existing mast and headframe will not be altered and the total number of antenna will remain at 9 with all equipment to be located within the existing cabin at ground level.

The Local Planning Authority mast register and our records of other potential sites have already been reviewed, the policies in the Development Plan have been taken into account and the planning history of the site has been examined.

All Vodafone installations are designed to be fully compliant with the public exposure guidelines established by the International Commission on Non-Ionizing Radiation Protection (ICNIRP). These guidelines have the support of UK Government, the European Union and they also have the formal backing of the World Health Organisation.

We look forward to receiving any comments you may have on the proposal within 14 days of the date of this letter.

Yours sincerely

Yolla de Sousa
