

## More Trucks heading for Clandon?

West Clandon Parish Council has received reports of a project to raise the level of the driving range at the Drift Golf Club in Horsley which would involve acquiring soil from the CrossRail project. We understand that the currently recommended supply route could result one loaded lorry passing through West Clandon every 11 minutes for 9 months. The route would leave the A3 at Burnt Common before passing down the Street, along Epsom Road and back through West Horsley. Empty trucks would return to the A3 by a more direct route. Apart from the impact of the traffic other issues raised included responsibility for road repairs and emissions. The Chairman will be contacting Surrey County Council and discuss the most effective route for registering a formal objection.
