

New options for kids at West Clandon playground

Work to upgrade the facilities at West Clandon playground has been completed with two exciting new pieces of equipment ready for action.

A conical climbing frame and high basket swing have been installed and both look set to become popular additions to the extensive range of options already on offer to village children.

The new additions were elected after consultation with the village last year. The work was funded through a Parish Council bid for 'section 106' support- a fund established with contributions from developers of the Meadowlands extension.

The new facilities aim to be inclusive with the basket swing in particular suitable for many children with disabilities
