

Eric Palmer Reports

“Please be aware that we have a repeat blockage of the main East Clandon to West Clandon sewer in the fields between our villages. I escorted a team from Thames Water to the site yesterday and they are clearing it but a large amount of unhealthy effluent has entered our streams moving North from the station. They will be cleaning and sanitising the ground in the next few days but in the meantime I suggest all animals are stopped from drinking from our streams.”
