

## Street closed for emergency road works

We have been advised that emergency works are being carried out by Affinity Water on The Street, West Clandon close to the junction with Meadowlands.

This is to carry out urgent repairs to a leaking water main. Unfortunately the leaking main has caused the road surface to collapse meaning the only safe way to carry out these urgent repairs is by closing the road.

Affinity have requested extended hours of working to get the works completed and the road closure lifted as soon as possible but this may take some days.
